Subject: RE: Requesting sample tracking query work tomorrow morning
Date: Sunday, December 18, 2016 9:52:49 PM

I am working through what sample tracking TCEQ has done so far and finding QA/QC issues with it in order to get this information into a database. This database (SCRIBE) for Weston has not yet been created.

We are still working on getting things in the database. I can't guarantee we have all the information from TCEQ. Prior to reporting to Austin Corpus should QA what we are reporting for them.

There needs to be a QA/QC on their data which we are working through currently in addition to creating maps for them. We will try our best to report these numbers for them based on the data we have access to including results.

I will update everyone as I make our way through everything tonight.

Subject: Requesting sample tracking query work tomorrow morning

Eric & Janine,
TCEQ Corpus just received a request/demand from TCEQ Austin for sample tracking information tomorrow morning.

Tomorrow at 7am, Weston @Corpus can provide 'complaint sample' vs 'routine sample' info.
Can this be added to the database and can we run a few queries by 8am-ish?

This is an example of what TCEQ Austin is requesting:

- total samples collected so far (complaint vs routine)
- total samples collected by day (complaint vs routine)
- quick results summary

Please provide HONEST feedback whether or not this is doable. I know everyone is super short on sleep and this is short on time.

appreciating you all,

Brandi Todd
